Reasons for Allowance

1. Claims 1-16, 18-20, 22-35, 37-40, and 42-45 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Referring to claims 1 and 24, the prior art does not teach or reasonably suggest, in combination with the remaining limitations, wherein the safety program is a set of control instructions.

Referring to claims 20 and 40, the prior art does not teach or reasonably suggest wherein the loader program rejects safety tasks when a partner controller is not in communication with the primary controller.

Referring to claim 22, the prior art does not teach or reasonably suggest whereby a controller receiving the tasks may automatically configure itself for the proper level of reliability or indicate a failure if that level of reliability cannot be obtained.

Referring to claim 42, the prior art does not teach or reasonably suggest identifying the task as to one of two levels of reliability a first level executable on a single processor and a second level requiring execution in tandem on two processors having an ability to compare execution to determine a fault in either of the two processor and then enter a safety state and transmitting the tasks to the safety controller so that the safety controller can automatically configure itself for the proper level o reliability or indicate a failure if that level of reliability cannot be obtained.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
